

What is the proposed timeline for construction of the elementary schools?

Struxture Architects plans to have construction documents (blueprints and specifications) completed by April 28. At that time, the Board will review those documents. Once the construction documents have been approved, the project will be put out for bid. Bids will be accepted in approximately 30 days and awarded in time for construction to begin in mid- to late-June. Our goal is still to open the schools in September, 2010.
